

Apreco Air Pressure Stabilisers and associated products utilise **Apreco-Ag™** silver technology, which is used extensively within the healthcare sector as an excellent anti-microbial protection in conjunction with good hygiene practices.

Apreco-Ag™ is extremely effective in helping to protect against harmful bacteria including MRSA, E-coli, Salmonella and C-diff. **Apreco-Ag™** inhibits the growth of micro-organisms thus forming an effective part of good hygiene procedures and frontline infection control.

The active agents used are incorporated during the manufacturing processes and are therefore present and active for the useful life of the product.

A rigorous validation and quality control programme is in place and all testing is conducted by an independent laboratory. This ensures the anti-microbial performance of the products.

The **Apreco-Ag™** technology is effective against a wide range of both gram positive and gram negative bacteria as well as fungi.

Apreco-Ag™ antimicrobial protection utilising Silver technology

Apreco Limited, The Bruff Business Centre, Suckley, Worcestershire, WR6 5DR, UK
